

About Me

Hi! My Name is **Ahmad Fikri Mudzaki** you can call me Eki, I am Full Stack QA Engineer

I have more than 10 years experiences. I really like to have challenges. Moreover, I could participate effectively in a team or work individually. I'm adaptable with any job environment and stack. Also having many experience on testing field, it's pleasure to learn and work with brand new technologies.

Experience

Senior QA ENGINEER - WorldeGroup(03/2023 - Present)

- Responsible to evaluate SDLC in the company and standardized QA process in the team.
- Improve the way the team testing and help developer and stackholder.
- Manage 2 teams to follow standardized process that company agreed to follow.
- Implement API testing using Postman newman and integrate it with Jenkins (CI/CD).

LEAD QA ENGINEER - Gojek(02/2017 - 11/2022)

- Responsible to standardized QA process in MOKA Android by following company standard. Responsible to maintain and optimize automated framework to cover 100% automatable cases using Java, RESTAssured for API automated test, Gitlab, BrowserStack as cloud testing, Spring, Appium. My team also improved our regression time from 19 hours to only 3 hours, 16 hours decrease of time.
- Leading 2 teams with two different product. Lead Merchant Platform, customize and improve automated framework, Enabling automated test on special device(POS EDC), create and maintain runner to be able to run it on EDC device and integrate it with CI/CD (Gitlab). Also improve our time in regression test from 3 days to only 2 day.
- Responsible to do Full Test Cycle for Go-Send, maintain TestCases for Go-Send, Test API services using Postman. Sanity Check for old Android version, Sometimes become speaker for QA meetup. Manage to give an idea to create small web UI for 3rd party testing, and successfully decrease time to integrate with ecommerce from 3 days to only 1 day.

Senior QA ENGINEER - Tokopedia(09/2016 - 01/2017)

- Tokopedia is a big ecommerce player in Indonesia, one of the unicorn startups. I worked as a Sr. Test Engineer that was responsible to maintain web, android & iOS automated tests. I was using a legacy framework from a previous engineer, it's a keyword driven framework based on selenium webdriver + Appium + Laravel (for frontend wise) + Jenkins as CI + Selenium grid to be able to run parallel. I only worked here for 5 months even if I passed the probation period because of personal reasons.

...many more

Skills & Tools

- OS (Mac, Windows, Linux)
- Virtualization (docker)
- CI/CD (gitlab, jenkins)
